Document code

01 Product identification

COMMERCIAL NAME	Fresh Hass Avocado
SCIENTIFIC NAME	Persea americana
COUNTRY OF ORIGIN	Mexico
SUPPLY REGION	Jalisco and Michoacán, México
CONDITION	Fresh, whole, clean, physiologically mature product, packed green
INTERNATIONAL HS CODE	0804.40
MEXICAN TARIFF LINE	0804.40.01, subject to customs validation
TRACEABILITY	Lot, origin, packing house, and packing date

02 Quality and acceptance criteria

Commercial grade: subject to the buyer's specification and the standard applicable in the European market.

ACCEPTANCE CRITERIA

- Whole fruit
- Clean product
- Free of decay
- Free of visible pests
- Free of open wounds
- Free of severe mechanical damage

- Free of severe sunburn
- Size uniformity per order
- Physiological maturity suitable for the agreed transit

Quality, defect, and shrinkage tolerances will be established in writing in the quotation, Purchase Order, or contract for each operation, considering destination market, transit time, maturity grade, and agreed logistics conditions.

Shelf life: variable depending on maturity at packing, temperature, transit time, logistics mode, and handling at destination. To be defined per each operation's program.

03 Sizes (European calibers)

16

≈ 250 g per fruit

18

≈ 222 g per fruit

20

≈ 200 g per fruit

The weights shown are mathematical references calculated on a 4 kg net box. Actual count and weight tolerances must be confirmed per the packing specification and buyer requirement.

04 Packaging and palletizing

BOX

- Ventilated corrugated cardboard box
- Net weight: 4 kg
- Count per requested size — mix per buyer requirement
- Marking: country of origin, variety, net weight, lot number, packing date, packer identification, traceability, PLU when applicable
- Outer dimensions and box strength: to be confirmed

PALLET

- Target configuration: 260 boxes per pallet — approximately 1,040 kg net per pallet
- Dimensions: 1200 × 1000 mm
- NIMF-15 treated and marked wood
- Boxes per layer, number of layers, total height: to be confirmed
- Gross weight: to be confirmed
- Use of strapping, corner boards, netting or film: to be confirmed

Pallet configuration is preliminary and subject to validation of final box dimensions and strength, pallet type, usable equipment height, air circulation, and carrier authorization.

05 Cold chain and logistics

Reference transport temperature: 5 °C to 6 °C pulp for green fruit, subject to maturity, transit duration, transport mode, and packer protocol.

- Fruit precooled to 6–7 °C before loading
- Controlled atmosphere: O₂ 4–6% · CO₂ 4–8%
- Fresh air ventilation closed, 0 m³/h — operating under controlled atmosphere
- Relative humidity 90–95%
- PTI mandatory, certified prior to positioning

- Set point confirmed in writing for each operation
- Datalogger use when required

TRANSPORT MODE	40' High Cube Reefer FCL + refrigerated inland transport
INCOTERM	CIF destination port, as requested in RFQ-EU-001-2026, to be confirmed in writing in the Purchase Order

06 Certifications and documents

PHYTOSANITARY EXPORT CERTIFICATE	Issued by SENASICA for each shipment, per EU requirements
GLOBALG.A.P.	Product available through producers and packing houses with GlobalG.A.P. certification, subject to validation of holder, number, scope, product, validity, and origin before confirming each operation
EUR.1	Available when applicable, subject to origin and documentary requirements of the specific operation
CHED-PP PRENOTIFICATION	Responsibility of the EU importer of record

Certifications, registrations, and authorizations issued to producers, orchards, or packing houses will be presented with their corresponding holder and scope. Cómeme Avocados does not claim as its own certifications issued to third parties.

EXPORT DOCUMENTATION AVAILABLE PER OPERATION

- Commercial invoice
- Packing list
- Export customs declaration
- Phytosanitary certificate
- Certificate of origin / EUR.1 when applicable
- Bill of Lading
- NIMF-15 marking or certificate
- Temperature report when applicable
- Additional documentation required by destination country customs

07 Availability

250 t

indicative monthly coordination capacity, all markets

Subject to season, size, origin, certifications, scheduling, and confirmation of availability. Supply programs can be structured throughout the year through different origins and seasons in Mexico, subject to size, certification, and volume.

Preferred commercial window: October to February (peak Normal season). A secondary quality window runs March to May, with smaller sizing and higher oil content.

08 Information needed to quote

- Destination country and city
- Destination port
- Volume per container / shipment
- Frequency
- Required sizes
- Size mix
- Box type
- Required certifications
- Sanitary requirements
- Preferred Incoterm
- Maximum transit time
- Expected maturity grade on arrival
- Monitoring requirements
- Special labeling
- Tentative shipping date

09 Claims

Any claim must be notified within 48 hours of delivery or release of the goods, per the agreed Incoterm.

MINIMUM REQUIRED EVIDENCE

- Photographs of closed and open boxes
- Labels
- Lot number
- Affected quantity
- Temperature on receipt
- Delivery document
- Inspection report
- Datalogger information when applicable

A CLAIM MUST DISTINGUISH BETWEEN

- Condition at origin
- Damage during transport
- Logistics delay
- Temperature deviation
- Handling after delivery
- Natural ripening
- Storage at destination

Claimed product must be kept in suitable conditions and may not be destroyed, repacked, mixed, redistributed, or disposed of without prior notice and sufficient evidence.

The final price will be confirmed in writing for each Purchase Order within the validity period stated in the corresponding quotation, per RFQ-EU-001-2026.

This data sheet is a technical-commercial reference document. Final conditions of product, quality, size, packaging, certifications, volume, price, logistics, tolerances, and responsibilities will be confirmed in the quotation, Purchase Order, and contract applicable to each operation.
