Document code

Market · RFQ-US-001-2026

01 Product identification

COMMERCIAL NAME	Fresh Hass Avocado
SCIENTIFIC NAME	Persea americana
COUNTRY OF ORIGIN	Mexico
SUPPLY REGION	Ciudad Guzmán, Jalisco
CONDITION	Fresh, whole, clean, physiologically mature product, packed green
HS CODE	0804.40.01
TRACEABILITY	Lot, origin, packing house, and packing date

02 Quality and acceptance criteria

Commercial grade: subject to the buyer's specification and USDA standards applicable in the U.S. market.

ACCEPTANCE CRITERIA

- Whole fruit
- Clean product
- Free of decay
- Free of visible pests
- Free of open wounds
- Free of severe mechanical damage
- Free of severe sunburn
- Size uniformity per order
- Physiological maturity suitable for the agreed transit

Quality, defect, and shrinkage tolerances will be established in writing in the quotation, Purchase Order, or contract for each operation, considering destination market, transit time, maturity grade, and agreed logistics conditions.

Shelf life: variable depending on maturity at packing, temperature, transit time, logistics mode, and handling at destination. To be defined per each operation's program.

03 Sizes (counts)

32

≈ 354 g per fruit

36

≈ 315 g per fruit

40

≈ 284 g per fruit

48

≈ 236 g per fruit

The weights shown are mathematical references calculated on a 25 lb (11.34 kg) net box. Actual count and weight tolerances must be confirmed per the packing specification and buyer requirement.

04 Packaging and palletizing

BOX

- Ventilated corrugated cardboard box
- Net weight: 25 lb (11.34 kg)
- Count per requested size — mix per buyer requirement
- Marking: country of origin, variety, net weight, lot number, packing date, packer identification, traceability, PLU when applicable
- Outer dimensions and box strength: to be confirmed

PALLET

- Target configuration: 78 boxes per pallet — approximately 884.5 kg net per pallet
- Dimensions: 122 × 102 cm
- Boxes per layer, number of layers, total height: to be confirmed
- Gross weight: to be confirmed
- Use of strapping, corner boards, netting or film: to be confirmed

Pallet configuration is preliminary and subject to validation of final box dimensions and strength, pallet type, usable equipment height, air circulation, and carrier authorization.

Active constraint: legal transport weight, not volume — maximum payload to be confirmed with carrier.

05 Cold chain and logistics

Reference transport temperature: 5 °C to 6 °C pulp for green fruit, subject to maturity, transit duration, transport mode, and packer protocol.

- Fruit precooled to 6–7 °C before loading
- Relative humidity 90–95%
- PTI mandatory, certified prior to positioning
- Temperature logging mandatory, downloadable on arrival
- Equipment loaded and sealed at origin; no intermediate unloading except official inspection

06 Documentation (United States)

PRIOR NOTICE & FSVP	U.S. importer's responsibility
EXPORT CUSTOMS DECLARATION	Mexican customs broker
PHYTOSANITARY CERTIFICATE	Exporter
LABELING & TRACEABILITY	Packing house

07 Certifications

PHYTOSANITARY EXPORT CERTIFICATE	Issued by SENASICA for each shipment
USDA / APHIS	Availability for the United States through orchards and packing houses registered under the SENASICA–USDA/APHIS program, subject to documentary verification before confirming the order
T-MEC / USMCA CERTIFICATE OF ORIGIN	Issued per shipment as applicable
PACA LICENSE	Buyer's responsibility

Certifications, registrations, and authorizations issued to producers, orchards, or packing houses will be presented with their corresponding holder and scope. Cómeme Avocados does not claim as its own certifications issued to third parties.

08 Availability

250 t

indicative monthly coordination capacity, all markets

Subject to season, size, origin, certifications, scheduling, and confirmation of availability. Supply programs can be structured throughout the year through different origins and seasons in Mexico, subject to size, certification, and volume.

Preferred commercial window: October to February, a period typically favorable for availability and scheduling.

09 Information needed to quote

- Destination city
- Delivery point
- Volume per shipment
- Frequency
- Required sizes
- Size mix
- Box type

- Required certifications
- Sanitary requirements
- Preferred Incoterm
- Maximum transit time
- Expected maturity grade on arrival
- Monitoring requirements
- Special labeling
- Tentative shipping date

10 Claims

Any claim must be notified within 48 hours of delivery or release of the goods, per the agreed Incoterm.

MINIMUM REQUIRED EVIDENCE

- Photographs of closed and open boxes
- Labels
- Lot number
- Affected quantity
- Temperature on receipt
- Delivery document
- Inspection report
- Datalogger information when applicable

A CLAIM MUST DISTINGUISH BETWEEN

- Condition at origin
- Damage during transport
- Logistics delay
- Temperature deviation
- Handling after delivery
- Natural ripening
- Storage at destination

Claimed product must be kept in suitable conditions and may not be destroyed, repacked, mixed, redistributed, or disposed of without prior notice and sufficient evidence.

The final price will be confirmed in writing for each Purchase Order within the validity period stated in the corresponding quotation, per RFQ-US-001-2026.

This data sheet is a technical-commercial reference document. Final conditions of product, quality, size, packaging, certifications, volume, price, logistics, tolerances, and responsibilities will be confirmed in the quotation, Purchase Order, and contract applicable to each operation.
